WORK EXPERIENCE

UX Designer/ Lead Front end Developer, at FEI systems

Jan 2016 to Present

I am responsible for UI design and front-end development of federal websites and healthcare products. As part of my day-to-day work I perform analysis of user requirements, research design patterns, develop wireframes, build mockups and interactive prototypes. I lead theme development, UI development, and also build websites with content management systems like word press and Drupal. Other duties include building information architecture, usability testing, and accessibility, developing style sheets, building UI libraries with html, CSS and JavaScript frameworks.

Jr. Application UI Developer, at FEI systems

July 2015 to Dec 2015

I was responsible for UI development in building front-end components of patient portal system and consent management system. Worked in an agile scrum based development process where my duties included UI development, testing, building wireframes and mockups, 508 and accessibility testing, building reusable styling component library.

Jr. Web Developer, School of Public Policy, University of Maryland

Jan 2014 – July 2015

Worked with School of Public Policy IT team tasked with regular maintenance of the school's websites. Developed and updated Drupal 7 and 6 based websites. Duties included front-end development, troubleshooting website errors by investigating server logs and training stakeholders, website implementation through various stages (Development, Test, Production).

Summer Web development Intern, School of Public Policy, University of Maryland

Summer 2014

Redesigned and developed multiple Drupal 7 websites for individual faculties at school of public policy. Created prototypes, wireframes for UI redesign. The website design was completed with a keen interest of maintaining user data and functionality.

Web developer/designer Masters of Information Management Student Association (volunteer work)

2014 - 2015

Developed and managed website for MIMSA and created logo for the organization.

PROJECTS

UX Designer / Lead Front End Developer Administration for Community Living and Older American Month

July 2015 to Present

- Lead Front End development and UI redesign for complete lifecycle of 2 federal websites. Responsible for analysis, planning, information architecture, UI design, wireframes, mockups, interactive prototypes, and Drupal theming using html, CSS, bootstrap 3.0, sass and JavaScript. Trained junior Drupal developer with day-to-day site maintenance and build.
- Daily duties include front-end development, site maintenance, production code deployment in Azure, performance monitoring and improvement, content migration and user training.
- Developed a custom module for migrating data from a web service when feeds module was not available in Drupal 8.
- Developed sub themes from bootstrap with SASS starter kit.
- Designed website wireframes, prototypes and mockups using Axure RP

Redesign of FEI Systems website

- Working as the Lead Word press Front End Developer and UX designer redesigning FEI systems website
- Responsible for restructuring content, analysis and UI redesign, building wireframes, mockups and interactive prototypes in Axure RP.
- Responsible for UI theme design and development using html, CSS, JS and building UI components for reusability.
- Building mobile responsive website with accessibility and reusable design patterns.
